Subject : **DATA ADEQUACY RECOMMENDATION FOR THE MORRO BAY POWER PLANT PROJECT - (99-AFC-6)**

The staff has completed its data adequacy review of the Application for Certification (Application) submitted on August 31, 1999. I have determined that the Application does not contain all the information required by Cal. Code of Regs., tit. 20, § 1704, Appendix B. Attachment A contains an overview of whether each technical discipline evaluated is adequate or inadequate. Attachment B contains staff's detailed data adequacy worksheets which describe staff's findings for each information requirement. On September 30, 1999, we received a letter from Greg Fuz, representing the City of Morro Bay, which also identified the Application as being incomplete. A copy of the City's letter is attached. At this time, we have not completed our review of the City's letter to determine whether they address the same inadequacies identified by staff or whether they identify additional inadequacies which should also be adopted by the Energy Commission. We hope to have such a review and recommendation to the Commissioners by October 6, 1999, and we also expect that by October 6, 1999, the City will provide a list identifying where they disagree with our data adequacy recommendation.

We have received a letter from the San Luis Obispo County Air Pollution Control Management District (District) stating that the Application is complete according to District standards. Based on discussions with representatives of the City of Morro Bay, we expect that one or more local community groups may provide comments on data adequacy. If such comments are received, staff will attempt to provide a recommendation to the Commissioners by October 6, 1999, on whether to incorporate these comments in the list of data inadequacies. We are not expecting any data adequacy comments from the California Unions for Reliable Energy (CURE).

At the Energy Commission's business meeting on October 13, 1999, I will be recommending that the Energy Commission not accept the Application until all the additional information specified in Attachment B is supplied. Pursuant to Cal. Code of Regs., tit. 20, § 1709 (c), if the Energy Commission accepts my recommendation, the Energy Commission shall indicate, in writing, those parts of the AFC which fail to meet the information requirements and the manner in which it can be made complete.

Appendix B (g) (1)	...provide a discussion of the existing site conditions, the expected direct, indirect and cumulative impacts due to the construction, operation and maintenance of the project, the measures proposed to mitigate adverse environmental impacts of the project, the effectiveness of the proposed measures, and any monitoring plans proposed to verify the effectiveness of the mitigation.	Section 6.6.1---6.6.9 p. 6.6-1-162	NO	Provide adequate "existing environment" information to determine impingement and entrainment effects, and thermal discharge effects. This normally requires a year of sampling information to address species present during all seasons of the year. Discuss temporary and permanent impacts to biological resources due to construction traffic, including trips into and out of the area and across the bridge.
Appendix B (g) (13) (A)	A regional overview and discussion of biological resources, with particular attention to sensitive biological resources near the project, and a map at a scale of 1:100,000 (or some other suitable scale) showing their location in relation to the project.	Section 6.6.1-6.6.9 P 6.6-1-162	YES	
Appendix B (g) (13) (B)	A discussion and detailed maps at a scale of 1:6,000, of the biological resources at the site of the proposed project and related facilities, and in areas adjacent to them, out to a mile from the site and 1000 feet from the outer edge of linear facility corridors. Include a list of the species actually observed and those with a potential to occur. The discussion and maps shall address the distribution of community types, denning or nesting sites, population concentrations, migration corridors, breeding habitats, and the presence of sensitive biological resources.	Section 6.6.1-6.6.9 P 6.6-1-159 Appendix 6.6-1	NO	Provide detailed maps of the project site (scale 1:6000 or greater detail) showing vegetation communities and any other biological resources.
